Company Profile

We “**New Aradhana Poly Plast Ind.**” are manufacturers and Exporters of **Roving Bobbins, Plastic Ring Spinning Tubes, Cones, Cheeses - standard** as well as suitable for **Rigorous Steam conditioning**. We have entire range suitable for all makes and models of machines. Products are manufactured as per drawing and design of machinery manufactures and also customized products to customers' specific needs.

Our company is known for producing high quality products and we fabricate these items according to set industry norms. Above mentioned products are highly admired among clients for their precise fabrication, eco-friendly nature, safe usage, nice look, and high durability. Further, these products are available in various sizes as per the specific needs of our valuable clients.

Why us ?

Backed decades of Experience in processing Plastic, team of experienced staff, Captive Tool Room with CAD – CAM facility, Moulding Machines with latest micro processing technology – our products meet customer's need of highest level of quality products. The demands made on the Modern Yarn carriers require, besides High Quality materials for the Carriers production, a specialized tooling technology making possible to produce tube with radial Run-outs well within the allowance by ISO Standards.

Improved Moulding technology and prime quality of material provide better performance and longer life of Bobbins.

Dimensions are maintained as per international standards adopted by the machinery manufacturers.

Close fitting tolerance and dimensional stability render the produces user friendly.

Available in wide range of attractive colors and finish.

Speed Frame Bobbins

Features

- ◆ Roving Bobbins suitable for Auto-doffing; with transportation system and manual doffing machines.
- ◆ Fitting And Dimensions as per ISO or Customer's Requirement.
- ◆ Narrow fitting tolerance, which ensures that there is no jump or jerk of the bobbins while starting the machine and during running of the machine.
- ◆ No Jamming of Flyers.
- ◆ Size Ranging from 10" Lift to 16" Lift.
- ◆ Suitable for LMW/ ZINSER / RIETER / MARZOLI / HOWA / TOYODA/ ELECTROJET and All Chinese makes and Models.

Ring Frame Tubes

Features

Our ring spinning tubes are developed to as per machine specifications and the requirements of their applications. The surface is designed for various types of yarn production (i.e. flat spiral, parallel grooves, micro grooves, Z-S, eroded) with different levels of roughness, a combination of various surfaces and hole perforation for special yarns.

- ◆ Recommended taper 1:38 (form A) and 1:64 (form A and B).
- ◆ Made from Poly Carbonate (PC), PC with Glass compounds, PBT, GF-POLYAMIDE and ABS.
- ◆ Variety of surface finish for all applications.
- ◆ Superior performance even at 25000 rpm.
- ◆ Fitting dimensions and wall thickness as per Machinery manufacturer specifications, which in turn increases life not only the tube but also the spindle.
- ◆ Excellent Dimensional Stability.
- ◆ Concentricity value as per International standards.
- ◆ Suitable for manual and auto doffing.
- ◆ Suitable for: LMW/ ZINSER / RIETER / MARZOLI / HOWA / TOYODA and All Chinese makes and Models.

Perforated Tubes & Cones

Features

- ◆ Our one-way and multi-way dye tubes are offered in various formats and dimensions. They are suitable for automatic winding machines.
- ◆ Several types of surfaces: round hole perforation, double hole perforation, grid-shaped perforation, parallel grooves, micro grooves, knurled, matte finish. Partly with tailing guide, thumb slot, thread notch.
- ◆ Suitable for single use & multiple uses.
- ◆ The Yarn for dyeing can be directly sold to clients.
- ◆ The Tubes are unique and they fit one inside other. This feature is very useful as because of this no spacer is required.
- ◆ Full range of Perforated Tubes and Cones for Dyeing, Steam conditioning of Yarn.

Cheese Tubes

Features

- ◆ Suitable for all automatic winders and open-end machines. One-way and multi-way tubes.
- ◆ Cheese Tubes with Top Bull Nose and Cut Nose.
- ◆ Perfect surface grooving to suit different yarn and fibre materials.
- ◆ Made from special polypropylene and other polymers.
- ◆ Very minimal eccentricity as per the industry standards.
- ◆ Produces best results and has longer life.
- ◆ Cheese Tubes Suitable For Air Jet Spinning.
- ◆ Available for OE, Winding, TFO, Textool Doublers, Texturising, Rubbing, etc.

Features

- ◆ We have different varieties of Cones available in 2°, 3°30', 4°20', 5°57', 9°15'.
- ◆ Top – Bull Nose or Cut Nose to suit different requirements.
- ◆ Materials: Polypropylene Co Polymer (PPCP).
- ◆ All sizes suitable for entire range of Cone winding
- ◆ Perfect surface grooving to suit different yarn and fibre materials.
- ◆ Premium Quality Working at high speeds.
- ◆ Micro Grooves & Dot Grooves for High Gripping.
- ◆ Produces best results and has longer life.

Cones

Spools & Doubler Bobbins

Features

- ◆ High impact strength ABS material is used to manufacture these Doublers bobbin.
- ◆ It is assembled by welding the flanges to both sides of barrel.
- ◆ Re-enforced by putting a steel pipe at the center, which is again welded at both outer sides of flanges.
- ◆ This provides the product much required additional strength.

Other Products

- ◆ Sewing and Industrial Threads
- ◆ Winding Cones
- ◆ Plastic Y Cones
- ◆ Plastic V Cones
- ◆ Plastic T Cones
- ◆ Baby Cones
- ◆ Unwinding Disc
- ◆ Adapters
